

KÖSTER Façade Cleaning Cream

Technical Data Sheet P 110 005

Issued: 2015-04-28

Cleaning agent for mineral surfaces

Features

KÖSTER Façade Cleaning Cream is a liquid, pasty Façade Cleaning Cream. It removes scaling and efflorescence from mineral substrates. It also cleans many other materials and surfaces quickly and effectively. KÖSTER Façade Cleaning Cream is made from natural, renewable raw materials. Due to its creamy consistency the material covers the surface excellently and doesn't drip. The long contact time helps to dissolve tough stains and soiling.

Technical Data

Active ingredient	washing active acid
Viscosity	approx. 2000 - 3000 mPa.s (creamy consistency)
Contact time	approx. 5 - 10 minutes

Fields of Application

KÖSTER Façade Cleaning Cream is suited for Façades, clinker, paving stones, and natural stone. KÖSTER Façade Cleaning Cream is not suitable for acid sensitive surfaces like Marble, calcareous sandstone, lime sand brick, and certain types of tile. KÖSTER Façade Cleaning Cream can lighten the substrate. A test area should always be applied in an inconspicuous area to test for changes in shade.

Application

Apply KÖSTER Façade Cleaning Cream undiluted with a soft brush or roller onto the substrate. Test the right dosage and contact time in an inconspicuous area. Typical contact time is between 5 and 10 minutes. The material should not be allowed to dry onto the surface. Keep the surface moist. Dried KÖSTER Façade Cleaning Cream can be re-activated with a wet scrubbing brush. After the contact time brush off the surface with a coarse scrubbing brush with ample amounts of water, or with a pressure washer until all residues are removed.

Consumption

Approximately 100 - 250 g/m² depending on the substrate. We recommend coating a test area with the material prior to the main application in order to determine the consumption, contact time and the effect of the product.

Cleaning

Clean tools after use with water.

Packaging

P 110 005	5 kg bucket
-----------	-------------

Storage

Store cool and frost free. KÖSTER Façade Cleaning Cream can be stored for a minimum of 2 years.

Safety

Wear acid resistant protective gloves and goggles when processing the material. Observe all governmental, state, and local safety regulations when processing the material.

Note:

Surfaces sensitive to acids such as glass, window frames and doors should be protected from contact with KÖSTER Façade Cleaning Cream. The rinse water should be collected separately and neutralized with lime.
